Career families

The 20 roles grouped into broader career paths. A family's score adds up its roles, so it shows the direction even when no single role stands out.

Please keep in mind

-  Some salary figures are worldwide because fewer than 30 people in your country or region share that role and experience level. Local pay may be very different.
-  These are suggestions based on the skills of developers in the Stack Overflow 2025 survey. A low score means your profile is unlike that role's respondents, not that you cannot do the job. Do not use this for hiring or salary decisions.

Model: Logistic Regression, tested on 4,615 survey respondents it never saw during training. The true role was in its top 3 for 84% of them (top 3 career families: 88%). Data: Stack Overflow Annual Developer Survey 2025, licensed under the Open Database License (ODbL) v1.0. <https://survey.stackoverflow.co/2025/>
